

ZIXUAN (JERRY) HUANG

Mansfield Center, CT | (859) 213-8358 | huangzixuan1999@hotmail.com | [LinkedIn](#) | [GitHub](#)
PhD Statistics Candidate | Data Science | Statistical Modeling | AI Evaluation

EDUCATION

University of Connecticut - Ph.D. in Statistics, Expected May 2030 | Mansfield Center, CT

North Carolina State University - M.S. in Statistics, May 2025 | Raleigh, NC

University of Kentucky - B.S. Mathematical Economics, Minor in Statistics, May 2022 | Lexington, KY

TECHNICAL SKILLS

Programming & BI: Python, R, SQL, SAS, Stata, JMP, Power BI, Tableau, VBA, Advanced Excel, LaTeX

Statistics & Data Science: Predictive Modeling, Machine Learning, High-Dimensional Statistics, Survival Analysis, Risk Modeling, Model Validation, Experimental Design, Statistical Inference, EDA, Biostatistics

AI & Data Engineering: LLM Benchmarking & Evaluation, Prompt Engineering, Logical Auditing, Data Pipelines, Automated Dashboard Development

EXPERIENCE

RUNNER (XIAMEN) CORP. - Data Analytics Intern | Xiamen, China | Jan 2026 - Present

- Work within the **Digitalization Promotion Center of an A-share listed conglomerate**, transforming complex supply-chain ERP data with R and Power BI into automated enterprise dashboards for C-suite decision support.
- Refactor raw ERP pipelines and streamline recurring analytics workflows, translating operational data into actionable executive insights supporting company-wide digital transformation.

Handshake AI - AI Tutor, STEM Specialist | San Francisco, CA | Nov 2025 - Present

- Contribute to **Project Phoenix** as both Reviewer and Prompt Author, developing rigorous proof-based, PhD-level mathematics and statistics tasks designed to stress-test LLM reasoning.
- Audit model responses for logical and mathematical failure modes and construct challenging benchmark problems that evaluate and advance generative-AI reasoning capability.

Outlier AI - Math AI Trainer / Senior Reviewer | San Francisco, CA | May 2025 - Nov 2025

- Served as **Senior Reviewer for the Rhind Math Evaluation Project** and contributor to Valkyrie, auditing AI-generated mathematical solutions for correctness, rigor, and output quality.
- Selected for the invitation-only **Oracle Program** for high-caliber contributors, receiving priority access to advanced AI-evaluation projects.

North Carolina State University - Graduate Teaching Assistant | Raleigh, NC | Aug 2024 - May 2025

- Supported **ST 445 (SAS Programming)** by evaluating programming assignments, providing technical feedback, and collaborating with faculty to improve instructional materials.

University of Kentucky - Research Assistant, Biostatistics | Lexington, KY | Jun 2024 - Aug 2024

- Conducted survival analysis on **TCGA-BRCA triple-negative breast cancer** RNA-seq and clinical data in R, evaluating prognostic gene-expression associations.
- Applied multiple cutoff strategies, interpreted hazard ratios and p-values, cleaned and merged patient-level genomic/clinical data, and explored mutation co-occurrence using oncoplots.

PICC Insurance - Data Science Intern | Chengdu, China | Jul 2021 - Aug 2021

- Extracted, cleaned, and joined SQL datasets and performed EDA on **30K+ auto-insurance claim records**, identifying payout and accident-risk patterns across vehicle categories, models, and price tiers.
- Built **3 interactive Tableau dashboards** and presented cross-functional risk-prevention recommendations with projected annual claim-payout savings of **10-15%**.

SELECTED RESEARCH PROJECT

TCGA-BRCA Data Analysis for Triple-Negative Breast Cancer (TNBC) | University of Kentucky | Jun 2024 - Aug 2024

- Collaborated with PhD-level faculty and statisticians to analyze **TCGA-BRCA genomic and clinical data in R**, conducting survival analysis to evaluate gene-expression associations with outcomes in TNBC patients.
- Applied prognostic cutoff strategies, interpreted **hazard ratios and p-values**, and performed mutation co-occurrence analysis to investigate clinically relevant genomic patterns.
- Developed reproducible **RMarkdown** reports and presented findings to the research team, translating complex statistical results into interpretable insights for cancer genomics research.

HONORS, AWARDS & CREDENTIALS

Hua Luogeng Gold Cup Mathematics Competition - Third Prize | Academic Excellence Scholarship (\$1,500) | 3x Dean's List | **GRE Quantitative: 166**

Project Phoenix: Blaze - Handshake | Issued Dec 2025 | [Show Credential](#) | **Model Validation 2 - Expert** - Handshake | Issued Dec 2025 | [Show Credential](#)
